Don't you know your trousers size ? Or don't you know how to buy the right trousers size? No problem. You just need a measuring tape and know the correct method to measure yourself. Below you will find the information you need to find your size. First of all, remember that to take the right size, you only have to wear underwear (other clothing may distort the result). Take note of your measurements and compare them with the table below, where you will find the Standard sizes associated with the centimeter measurements of the garment specifications.

HOW TO TAKE YOUR MEASUREMENTS

To find your ideal size , take measurements in direct contact with the body.

WAISTLINE:

Measure your waist by placing the tape measuring around your belly button.

HIPS:

Measure your hips by placing the tape measuring around the widest point.

INNER LEG LENGTH:

Measure the inside of your leg , from the inside thigh to the floor .

ARE YOU UNDECIDED BETWEEN TWO SIZE?

If your measurements are halfway between two size in the table, choose the larger one.

SIZE GUIDE

Check the equivalence of your usual size on the table and compare it with the garment measurements
This is generic guide and the sizes may vary depending on the model, the fabric and the season.
